## About us

### Our Mission

Boston Medical Center (BMC) Grayken Center for Addiction Training and Technical Assistance (TTA) offers free services to Community Health Centers (CHCs) and other health and social service providers on evidence-based, comprehensive care for treatment of substance use disorders.

#### Expand Capacity

Expand the ability of the health care system to care for patients with substance use disorders using comprehensive models of care and effective medications for addiction treatment (MAT)

#### Improve Quality

Improve quality of care provided to patients with substance use disorders through identification of unmet needs and high-risk populations

#### Increase Sustainability

Sustain effective treatment services by integrating best practices into the cultures of provider organizations

#### Destigmatize Addiction

Destigmatize substance use disorders and addiction treatment to reduce barriers to patients accessing life-saving, evidence-based care

# Real-time Consultation: Pediatric SUD resources from the Massachusetts Child Psychiatry Access Program (MCPAP)

In collaboration with the Boston Children's Hospital Adolescent Substance Use and Addiction Program (ASAP), MCPAP now offers:

- 1) **Real-time consultation** from a pediatric addiction medicine specialist (colleague to colleague)—call your regional MCPAP team and ask for ASAP.
- 2) **Virtual counseling** by an LICSW specializing in pediatric SUD, to support primary care based treatment for patients. Consultations are free; counseling appointments are billed to patient insurance through Boston Children's.

To access, PCPs should continue to call their regional MCPAP line and ask to connect with the ASAP team. The ASAP consultant on-call will speak with the PCP and determine if virtual substance use counseling would be appropriate for their patient. The ASAP-MCPAP staff will complete intake information and reach out to your patient to schedule the first appointment.
