

# Cervical Cancer Screening and Prevention Event

**Are you vaccinated against HPV?  
Have you had a pap smear in the last 3-5 years?**

**HPV (Human Papillomavirus)** is the virus that causes cervical cancer.

**Gardasil** is a vaccine to prevent HPV infections and different cancers in men and women. It is recommended for **everyone ages 9 - 45**.

It is recommended people with a cervix have a **pap smear every 3-5 years from ages 21 to 65**.

**Join us LIVE on Zoom  
Monday, November 13th 5:00 PM**
